

# Forward Motion BMX

*“The Forward Motion team provided an amazing show and an even better message! Their team of professionals not only wowed students with their stunts, but also brought a message of positivity in decision making and academics. I will definitely use this group in the future to implement bike safety and promote physical health and good decision making with my students.”*

—Principal, Pikeville, NC

*“I want to extend a sincere thank you on behalf of all of our students and staff. We thoroughly enjoyed the performance. It was by far one of our best assemblies. Students were very excited and also received a positive message from you guys. Your comments about passion for your work, remaining drug-free, and bike safety were greatly appreciated. Again, thank you!”*

—Principal, Elkton, MD

For the first time ever, The Bureau of Lectures is incredibly proud of the opportunity to bring your school Forward Motion BMX. Incorporating an inspirational theme to make the most of their time in front of your students, professional BMX riders showcase extreme athleticism, years of disciplined practice and a positive attitude to help guide your students to find their passion in life. Tricks like back-flips and “supermans” enable riders to capture even the most difficult audience’s attention, opening a window to present inspirational messages that can influence students to think about their own futures and how they can become positive role models for their community. Shows are all inclusive, utilizing two professional BMX riders, a 4ft tall jump and professional sound equipment for an action packed and inspirational show experience. In their own words, “Our show is designed to help us lead by example and ignite the desire to do so in others.”
